Please find below our daily iFlow update.

The charts at the top show iFlow Mood, a measure of investor preference for stocks or bonds, and two iFlow strategy flow/holdings series, Carry and Trend.

High/low Mood readings indicate investor behavior is largely risk seeking/aversion. The strategy charts denote strong/weak flows correlation with each investment style. We add holdings data to each, with grey/red corresponding to statistically significant high/low positioning.

Below the strategy charts, we show normalized aggregate flows of equity, sovereign bond and currencies for 34 economies (bottom right), and global equity flows sector and region (bottom left).

The three bars in table show 1 week, 1 month and 3 month average scored flow.
