# Introducing CONTROL CENTER

LiquidityDirect offers automated investing through the Control Center, which allows you to sweep excess cash into specific products to maximize investments.

### WHAT ARE SWEEPS?

A sweep automatically transfers excess cash funds into investment vehicles such as money market funds, FICC repos or cash reserve deposits. The sweeps intelligent engine allows you to maximize your cash investment while adhering to compliance and investment rules you configure in the Control Center. It also allows you to minimize risk by redeeming out of money funds to cover any negative cash balance positions from transactions and wiring activity.

### HOW DOES THE CONTROL CENTER WORK?

- Tailor compliance rules for investment diversification and policy adherence
- Select funds you want to invest in
- Specify the model for sweep investment allocation

**The waterfall model** allows you to set the preferred order for funds to be swept into, and the sweeps will invest excess cash cascading down the list when investment limits are reached

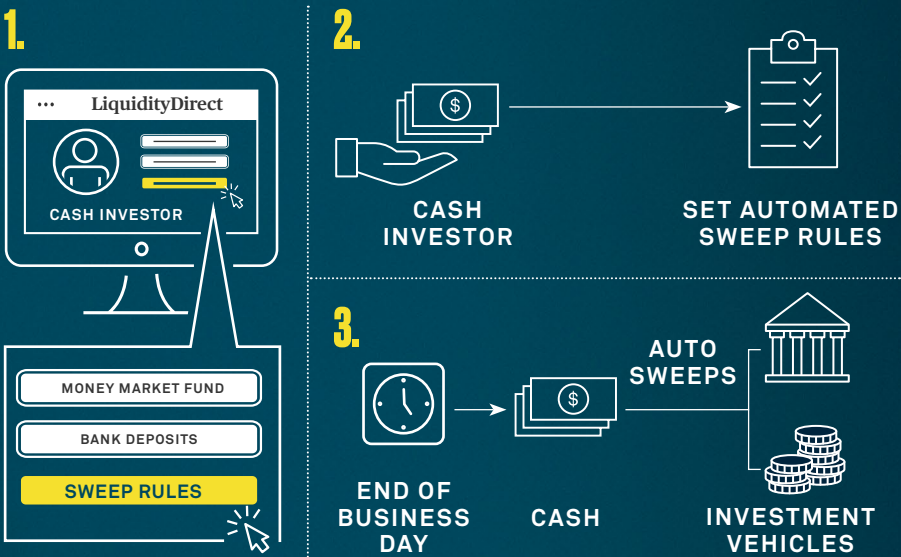

**The percentage model** allows you to invest excess cash based on percentages allotted to each fund  
Both models also redeem money funds in the reverse to cover any negative cash positions

- Optionally, have your sweep automatically rebalance your investments daily to match your sweep rule configurations

### ADVANTAGES OF UTILIZING SWEEPS THROUGH THE CONTROL CENTER

- Set and forget – automatically sweep every day
- Rebalance your investments daily
- Real-time updates take effect in next sweep
- Easy maintenance – one rule for multiple accounts
- Dual authorization – optionally require approval for all rule changes
- Diversify and comply – set maximum investment parameters

**1.**

Sweep rules are set up on individual accounts, any subset of accounts or all accounts.

**2.**

You set your sweep rules based on your investment guidelines.

**3.**

Cash is automatically swept at the end of the day into the respective investment vehicles.

## Focused Investing\*

Powered by BNY  
ESG Data Analytics

Socially responsible investing has become a focal point in recent years, with some entities mandated through their investment guidelines to invest a portion or all of their investments in Focused Investing or Impact funds.

New site design coming soon.

LiquidityDirect provides extensive analytics applications to let you understand and interpret how funds are conducting socially responsible investing and how funds can help you better align your investments with your sustainable investing values.

LiquidityDirect's Focused Investing taxonomy includes four categories:

1. Diversity & Inclusion
2. Negative & Positive Screening
3. Charitable Donations
4. Environmental, Social and Governance

Partnering with leaders in the segment, LiquidityDirect uses the following rankings to ensure that sustainable investments are accurately and reliably labeled. Scores are then normalized across ESG rating agencies to make it easy for you to cross-compare funds and securities.

**MSCI ESG Fund Rating:\*\*** Designed to assess the resilience of a fund's aggregate holdings to long-term ESG risks. Highly rated funds consist of issuers with leading or improving management of key ESG risks. The "Fund ESG Quality Score" is assessed using the underlying holdings' overall ESG scores, ratings and rating trends. The fund ESG Quality Score is then mapped to the AAA–CCC letter-rating categories.

**Questionnaire:** Fund companies will be able to provide additional context alongside the rankings from the ESG rating agencies.

# 04. Sponsored Cleared Repo\*

Sponsored Cleared Repo allows you to invest cash in repo transactions collateralized with US Treasuries facing the Fixed Income Clearing Corporation (FICC), a central counterparty (CCP).

When BNY sponsors a counterparty, we facilitate all the settlement and collateral management responsibilities for you, all within the confines of BNY's securities clearing, custody and collateral management infrastructure.

Participants in LiquidityDirect enjoy a wide range of benefits when investing cash through Sponsored Cleared Repo:

## SAFETY & STABILITY

Face a highly rated clearinghouse on your cash investment without the obligations of full CCP membership.

## ENHANCED EFFICIENCY

Experience easy access to a collateralized investment through the established and trusted LiquidityDirect platform. We provide ongoing maintenance and reporting around the repo, including many of the required operational elements concerning rolling overnight transactions over longer durations.

At trade maturity we confirm that both the cash and collateral are returned.

## THE BNY ECOSYSTEM

All pre-trade and post-trade elements of your Sponsored Cleared Repo activity take place within our custody and settlement ecosystem, maximizing operational efficiency and minimizing risks associated with moving elements of the trade flow outside of BNY.

## SWEEP VS. DIRECTED

Clients can choose to sweep their FICC repo investment or directly trade on LiquidityDirect each day.

## How Sponsored Cleared Repo Works Through LiquidityDirect

1.

You select Sponsored Cleared Repo as your investment option on LiquidityDirect.

2.

With BNY acting as sponsor, cash is invested overnight facing the FICC clearinghouse and is then collateralized with US Treasury securities.

3.

Cash plus earned investment gain is returned to you the following day; US Treasury collateral is returned to FICC.

# 05. Insured Cash Sweep®\*

Looking for the security of investing in cash deposits, but with the additional safety of access to multimillion-dollar FDIC insurance coverage? If so, then Insured Cash Sweep (ICS®) may be the right investment for your portfolio.

ICS is a deposit placement service that enables you to submit multimillion-dollar deposits for placement at third-party FDIC-insured depository institutions.<sup>1</sup> The service, offered by IntraFi Network<sup>2</sup> – and available through BNY’s LiquidityDirect platform – provides access to multimillion-dollar FDIC<sup>3</sup> protection for investors.

By working directly with us, you can access multimillion-dollar FDIC coverage from the depository institutions participating in the ICS network. ICS can help you achieve your investment goals while protecting your principal.

## HOW DOES IT WORK?

With ICS, through a single account at BNY, your funds are placed in deposit accounts at various network member banks.\* This diversification means your exposure to any one bank, including interest paid, does not exceed FDIC coverage limits.

To access coverage, you also have wide latitude to exclude banks at which your money is already on deposit. Regardless of how many institutions you are invested with, you’ll receive one statement.

\* Offered on LiquidityDirect by IntraFi Network. Product offered only in the US to institutional clients, unless otherwise permitted by local law, on LiquidityDirect through BNY. The deposit-taking institution may not be licensed outside of the US and deposits may not be insured under deposit protection schemes other than FDIC’s.

Placement of funds through the ICS service is subject to the terms, conditions, and disclosures in the service agreements, including the Deposit Placement Agreement (“DPA”). Limits and customer eligibility criteria apply. In the ICS savings option, program withdrawals are limited to six per month. Although funds are placed at destination banks in amounts that do not exceed the FDIC standard maximum deposit insurance amount (“SMDIA”), a depositor’s balances at the relationship institution that places the funds may exceed the SMDIA (e.g., before ICS settlement for a deposit or after ICS settlement for a withdrawal) or be ineligible for FDIC insurance (if the relationship institution is not a bank). As stated in the DPA, the depositor is responsible for making any necessary arrangements to protect such balances consistent with applicable law. If the depositor is subject to restrictions on placement of its funds, the depositor is responsible for determining whether its use of ICS satisfies those restrictions. ICS and Insured Cash Sweep are registered service marks of IntraFi Network LLC.

<sup>1</sup> Subject to FDIC’s limit as applicable from time to time. You may obtain information by visiting the FDIC website at [www.fdic.gov](http://www.fdic.gov).

<sup>2</sup> Founded June 2002, IntraFi Network, LLC, provides creative solutions to the banking and thrift industries. BNY provides sub-custodial, recordkeeping and settlement services.

<sup>3</sup> The Federal Deposit Insurance Corporation (FDIC) is an independent U.S. government agency that currently insures deposits up to \$250,000 per depositor (per insurable capacity), per bank, subject to certain conditions.

<sup>4</sup> Following a request submitted by the depositor, funds are sent to money market deposit accounts when using the ICS savings option and to demand deposit accounts when using the ICS demand option.

\* If the depositor chooses both the demand and savings options, the depositor will need to have a separate transaction account for each.

# 06 Commercial Paper\*

Commercial paper (short-term promissory notes) can be issued by corporations, banks and asset-backed entities. Many issuers use the commercial paper (CP) market to raise cash needed for their current transactions and to finance short-term assets, such as accounts receivable and inventory. Investors consist of a large and diverse group of institutional buyers, including money market mutual funds, corporations and municipalities.

## INTRODUCING CP ON LIQUIDITYDIRECT

# 08 Mutual Funds

**As you continue to seek alternative investment opportunities to manage risks and improve performance, mutual funds are often an investment option that can be utilized in this regard. For our clients, the LiquidityDirect platform provides simple point-and-click trade execution of mutual funds to achieve investment goals.**

The mutual funds market, segmented by type (stock funds, bond funds, money market funds and hybrid funds), is estimated to grow toward \$72 trillion or more by the end of 2027. The US mutual fund market remains the largest in the world (closer to \$27 trillion in 2021) and accounted for more than 40% (out of which 55% is in stock funds, 21% in bond funds, 18% in money market funds and 7% in hybrid funds) of the global mutual funds market.

A mutual fund's portfolio is structured and maintained to match the investment objectives stated in its prospectus, and it varies by the fund type. While money market funds are a great option for your operational cash, you can invest other segments of cash (reserve, strategic or other) in other mutual fund types based on your investment goals and policy guidelines.

We are providing access to a broad range of mutual funds in LiquidityDirect through our partnership with Matrix, allowing you to choose the right fund for your investment goals.

## THE ADVANTAGES OF OPEN-ENDED MUTUAL FUNDS:

- Liquidity access:
  - The investor has no restriction on the redemption of the units of the funds. It provides a fairly quick liquidity option (T+1)
  - Units are redeemed at the end of day NAV on the day of redemption
- Diversified portfolio – Mutual funds allow an efficient way to diversify your portfolio while also covering most major asset classes and sectors (as described in its prospectus)
- Ability to generate an enhanced yield compared to other cash alternatives as these funds invest in broader range of assets than traditional MMFs

## BENEFITS OF TRADING OPEN-ENDED MUTUAL FUNDS ON LIQUIDITYDIRECT:

- One-stop shop – One-click access to highly diversified pools of ultra-short-duration fixed income assets
- Cost and operational efficiency – Consolidate your cash investments in your LiquidityDirect account
- Automatic settlement – All trades will settle directly in client's BNY custody account
- Time efficiency and ease of use – Ability to view and direct transactions in open-ended mutual funds in the same LiquidityDirect account as your MMFs and other securities
- Real-time updates – Trade status, wires, cash and positions updated online in real time
- Strong controls – Ability to set up different access levels, including trades, approvers and view-only access
- Consolidated reporting – Reports will include a consolidated view of all securities held in your custody account including mutual funds
- Report scheduling and distribution – Ability to run on-demand reporting and scheduled reporting in multiple formats for your overall cash portfolio and securities

Mutual funds are not available to all clients. Clients must be LiquidityDirect customers and invested in other products. The service is only available for funds that are eligible on the NSCC Fund/SERV platform. BNY does not offer access to other funds that would require BNY Mellon to establish a direct relationship with transfer agents.

Money market fund shares are not a deposit or obligation of BNY Mellon. Investments in money market funds are not insured, guaranteed, recommended or otherwise endorsed in any way by BNY Mellon, the Federal Deposit Insurance Corporation or any other government agency. Although a money market fund seeks to preserve the value of your investment at \$1.00 per share, fund shares are subject to investment risk and your investment may lose value. Money market fund yield performance represents past performance, which is no guarantee of future results and investment returns will fluctuate. Before investing, investors should carefully consider the investment objectives, risks, charges, tax impact and expenses of the fund that are explained in each fund's prospectus. The following factors, among many, could reduce any one fund's income level and/or share price: interest rates could rise sharply, causing the value of the fund's investments and its share price to drop; interest rates could drop, thereby reducing the fund's yield; any of the fund's holdings could have its credit rating downgraded or could default; and there are risks generally associated with concentrating investments in any one industry. Investments in instruments of non-U.S. issuers are subject to the risks of certain domestic events—such as political upheaval, financial troubles, nationalization (certain assets, entities or sectors) or natural disasters—that may weaken a country's securities markets. Country risk may be especially high in emerging markets. Such investments may be affected by market risk on a global scale based on responses of certain foreign markets to markets of other countries or global market sectors. Foreign-currency denominated securities are subject to fluctuations in exchange rates that could have an adverse effect on the value or price of, or income derived from, the investment. Investments in foreign instruments are subject to the risk that the value of a foreign investment will decrease because of unfavorable changes in currency exchange rates.

Securities instruments and services other than money market mutual funds and off-shore liquidity funds are offered by BNY Mellon Capital Markets, LLC.

Please note that there are other investment options available to you in addition to those referenced above. The Bank of New York Mellon is not an investment advisor and is not providing you with investment advice. If you require investment advice, please consult with an investment advisor. Investments in securities, including mutual funds, (i) are not FDIC insured, (ii) are not bank-guaranteed, and (iii) may lose value.
